Prof. Dr. Ivan Penkov
School of Engineering and Science
Jacobs University Bremen
Germany

Professor Penkov,

My graduate student, Jiarui Fei, would like to participate in the summer school "Structures in Lie Representation Theory". I strongly support his participation in the summer school. Jiarui has worked under my supervision on representation theory of quivers, finite dimensional algebras and quivers with potentials. I am sure that the summer school will be very relevant to his research. Jiarui is a strong student with broad interests.

I understand that Jiarui is also applying for a scholarship to cover his accomodation and travel (or part of it). He will also try to find other sources of funding. I would gladly support him financially, but as of now I am not yet sure if I have the funds because my next NSF grant is still pending.

Sincerely,

Harm Derksen
