April 8, 2009

To whom it may concern:

It is my great pleasure to write this recommendation letter on behalf of Mr. Alekzander Malcom. I first met Alekzander right after I arrived in Arlington in the fall of 2008. My colleagues introduced him as the graduate student with the best performance on both required qualifying exams – linear algebra and real analysis. Although Alekzander is a first year graduate student his background in algebra is remarkable. During this academic year, he took graduate courses in Lie algebras and Category Theory and impressed both instructors.

Recently Alekzander expressed an interest in doing research in the field of Lie algebras and superalgebras. His interest in Lie algebras started during his undergraduate years, when he had a major in Physics. We have discussed various topics for a possible research in the summer of 2009. Based on our discussion, I decided to introduce Alekzander to the representation theory of Lie superalgebras and assign him a problem on describing some weight modules of lower rank Lie superalgebras.

During our discussions I realized that Alekzander is a very hard working and strongly motivated young person. His intention to learn every single detail is very impressing. Based on our conversations, I am positive that the Summer School "Structures in Lie Representation Theory" will be an invaluable experience for him, especially because of his sincere interest in Representation Theory. Meeting with the leading experts in the field and learning the material from the source will play an important role in the future career of a promising young mathematician like Mr. Malcom.

I strongly recommend Mr. Malcom for travel and lodging support for the Summer School "Structures in Lie Representation Theory".

Sincerely,

Dimitar Grantcharov

Assistant Professor
University of Texas, Arlington
